Who and what stands behind Ticket4Life, and the limits of what this website is and does.

> Plain-language summary: Ticket4Life is a set of public smart contracts on the Base network. There is no company behind it. This website is only a window onto those contracts; it holds none of your money and executes none of your transactions. Nothing here is investment, financial, legal, or tax advice. Taking part carries real risk, including the risk of losing some or all of what you commit. You are responsible for obeying your own local laws.

1. A NON-CUSTODIAL PROTOCOL ON BASE

Ticket4Life is a prize-linked, lifetime draw-ticket protocol (the “Protocol”) made up of public smart contracts deployed on Base, an Ethereum Layer-2 network operated by Coinbase. This website (the “Interface”) is a non-custodial front end that lets you read the Protocol and prepare transactions for your own wallet to sign.

- There is **no legal entity, no company, and no jurisdictional base** behind Ticket4Life. No corporation is formed, no registered office is claimed, and no country of establishment is asserted.
- There is **no fiduciary relationship** between you and Ticket4Life. Ticket4Life is not a bank, broker, custodian, exchange, money-services business, fund, or financial adviser.
- The Protocol’s logic lives in public smart contracts whose code and every interaction are recorded on Base and verifiable by anyone. This is not a claim of complete decentralization: the Protocol is owned by a multi-signature wallet (a Gnosis Safe, 2-of-3) — the on-chain owner of the Prize Pool, the Treasury Vault and every related contract — which manages the treasury, settles Buybacks, and configures parameters such as the mint price, the marketplace fee, and whether the Buyback is open and at what price; a separate, rate-limited operator key executes routine operations only (draw request, capped weekly pot funding, buyback price synchronisation) and cannot withdraw funds. Ownership cannot be renounced. Every action of either account is a public on-chain transaction.

Because the Protocol is non-custodial, Ticket4Life cannot access, move, freeze, or seize your funds or your Ticket NFT, cannot reverse, cancel, or modify a transaction, and cannot recover lost keys. If the Interface goes offline, the underlying contracts remain and can be reached directly through any compatible wallet or block explorer.

2. NATURE OF THE INTERFACE

The Interface is an **informational and access tool only**. It displays public on-chain data, presents the Protocol’s mechanics, and helps you construct transactions. It does not itself execute anything.

- The Interface holds no assets and takes no custody. Your Tickets, your USDC, and your keys stay with you and with the public smart contracts at all times.
- Every economic action — minting a Ticket, entering the Draw, selling to the Protocol (the “Buyback”), listing on the marketplace — is carried out by the smart contracts and by your own wallet signature, never by Ticket4Life.
- Ticket4Life does not guarantee that the Interface will be available, accurate, complete, or free of error or interruption. Prices, prize figures, and other on-chain values shown here are informational and may lag the chain; the smart contracts are

the sole source of truth.

3. NO INVESTMENT, FINANCIAL, LEGAL, OR TAX ADVICE

Everything on this website is provided for general information only. Nothing here is, or should be relied on as, investment, financial, legal, accounting, or tax advice, and nothing here is a solicitation, recommendation, offer, or invitation to buy, sell, or hold any Ticket, token, or other asset.

- A Ticket is a **game and prize-linked digital collectible — an entertainment product**. It is not an investment, security, deposit, loan, fund unit, or e-money. No profit is promised, no yield accrues to you as a holder, and no return of your money is guaranteed.
- Participation involves risk. Prize amounts depend on accrued yield and Protocol parameters and are **not guaranteed**. The treasury capital that funds prizes and the Buyback is itself deployed into yield strategies — automated grid-trading bots and third-party stablecoin venues — which carry market, liquidity, smart-contract, and counterparty risk and may underperform or lose value.
- The Buyback is **discretionary and conditional**. It executes only if the funding wallet holds sufficient USDC and has authorised the payment, and it can be closed, re-priced, or withdrawn by the Operator at any time. It is not a redemption right, a repurchase obligation, or a guarantee. **You may recover less than you paid, or nothing at all.**
- **You may lose some or all of the amount you commit.** Never commit funds you cannot afford to lose. Consult your own qualified professional advisers before taking part, and make your own independent assessment of the mechanics and the risks.

4. NO WARRANTIES AND LIMITATION OF LIABILITY

The Interface, the Protocol, and all related content are provided **"as is" and "as available"**, without warranties of any kind, whether express or implied, including any implied warranties of merchantability, fitness for a particular purpose, title, or non-infringement, and without any warranty of availability, accuracy, security, or uninterrupted or error-free operation.

To the maximum extent permitted by law, Ticket4Life, the Operator, and their contributors accept no liability for any loss or damage arising from your use of, or inability to use, the Interface or the Protocol, including losses caused by smart-contract behaviour, yield-strategy performance, network or oracle failure, Interface downtime, lost keys, or your own decisions. This is a summary; the full limitation-of-liability clause, the class-action waiver, and the individual dispute-resolution terms are set out in the Terms and Conditions, which govern in the event of any conflict. Nothing here limits any mandatory, non-waivable rights you may have under applicable consumer or local law.

5. YOUR RESPONSIBILITY

You alone are responsible for your participation and for complying with the laws that apply to you.

- You must be of legal age in your jurisdiction and legally permitted to use prize-linked and crypto services. A country-level check runs in memory when the app loads and is never stored.
- The Interface is **not available** in Cuba, Iran, North Korea, Syria, Russia, or Belarus, in any jurisdiction where prize-linked or crypto products are prohibited, or to persons subject to OFAC, UN, or EU sanctions.
- You are solely responsible for your local-law and sanctions compliance, your taxes, the security of your wallet and private keys, and understanding the mechanics before you take part. If a rule in your jurisdiction prohibits your participation, you must not use the Interface. See the Terms and Conditions for the complete eligibility and jurisdiction provisions.

6. OPEN & AUDITABLE

The Protocol is designed to be verified rather than trusted. Every contract is public and can be inspected on BaseScan, and every mint, Draw, and Buyback is a public on-chain transaction.

Each weekly Draw draws its randomness from **Pyth Entropy**, verifiable on-chain through the published proof (the sequence number and the random number). Winning Tickets are de-duplicated by tokenId, and the outcome can be independently checked against the chain.

The core contracts on Base mainnet are:

CONTRACT	ADDRESS
USDC	`0x833589fCD6eDb6E08f4c7C32D4f71b54bdA02913`
Treasury Vault	`0xB409f318fCf2D6B9FFd6a2B3625139b8548ce690`
Ticket NFT	`0x67A4D050760417679185aB054C5a60C8b599C56f`
Draw Registry	`0x45C9a83b18bb537CA572D2684b767F298Ee8bd7d`
Prize Pool (V2.2)	`0xD7379f0DC75b367F4Cf40bc01d349D85B5064D95`
Prize Pool (draws #1–#10, retired)	`0x957f0b1d4D387e2f6Fa2988eF57976E8fC377d96`
Protocol Safe (owner, 2-of-3)	`0x6Cae80c9E11234194A975c609aE744828331623f`
Marketplace	`0x2AAc6EBCfE564A01241fd32d526e8b0B2F36e163`
Pyth Entropy	`0x6E7D74FA7d5c90FEF9F0512987605a6d546181Bb`
Cooldown Registry	`0x8cFca8C2C85670dA7b8D5302cA5AF084a46Ba841`
Transparency Registry	`0x5bEfD6e73473380E69cCABFceE1674BBeE419EC6`

Always confirm any address independently on BaseScan before interacting.

7. INTELLECTUAL PROPERTY

The Ticket4Life name, logo, brand, and the design, text, and layout of the Interface are the property of their owner and are protected by intellectual-property law. You may not copy, reproduce, or use them to imply endorsement or affiliation without permission.

This is separate from the Protocol's smart contracts, which are public on Base and readable by anyone. The right to inspect, verify, or interact with the on-chain contracts does not grant any right in the Ticket4Life brand, and the brand grants no rights over your wallet, your Tickets, or the contracts.

8. CONTACT

You can reach Ticket4Life on X (@Ticket4Life) and on Telegram; the links are in the site footer. These channels are for information and community only; messages sent through them do not create any advisory, fiduciary, or contractual relationship, and nothing shared there is investment, financial, legal, or tax advice.
